Table of Contents

1 Introduction

1. Introduction

Goal

Establishes multi-hop paths for characterized flows with deterministic properties:

- Latency Guarantess
- Ultra-Low Packet Loss

Layers

DetNet operates at the IP layer and delivers service over lower-layer technologies such as MPLS and Time-Sensitive Networking (TSN).

Techniques

Techniques for providing DetNet Qualities of Service: [1]

- Resource Allocation
- Service Protection
- Explicit Routes
